Summary

Full-Stack Developer experienced in building robust, user-focused web applications, combining technical depth with customer-facing consulting expertise.

Skills

Languages: JavaScript, TypeScript, HTML , CSS , Python(basic) , Java(basic)

Frontend: React.js, Tailwind CSS, Material UI, Chakra UI,Bootstrap

Backend: Node.js, Express.js, TRPC, RESTful APIs, Web APIs

Database: MongoDB, SQL, MySQL

Tools/Other Skills: Git, GitHub, Figma, DSA, Cursor, VS Code, ChatGpt, Postman, JWT, Vercel, AWS

Experience

Software Engineer, Masai School – Bangalore, IN

Sep 2024 – Present

- Engineered scalable end to end features such as AI-based practice tools with ChatGPT API integration in a microservice architecture resulting in a 20% increase in user engagement actively used by 10K+ students
- Designed robust APIs using Node.js, TRPC and MongoDB, demonstrating strong backend development and database skills. Implemented comprehensive testing to ensure API reliability and performance
- Built pixel-perfect, responsive frontend pages using React Router with Tailwind CSS, Material UI, and Chakra UI, featuring dynamic routing and modular components for a seamless user experience
- Refactored and optimized Smart Learning Management System React app with code-splitting, lazy loading, and memoization, improving dashboard performance and achieving up to 40% faster page loads during peak hours
- Deployed applications on AWS EC2, configured Auto Scaling and Load Balancer for resilient service routing, used S3 for dynamic asset delivery, and set up CloudWatch for real-time monitoring and alerting with detailed technical documentation

Technical Support Consultant, iSchoolConnect – Mumbai, IN

Aug 2021 – Dec 2023

- Provided product demos, technical consultations, and personalized guidance to thousands of clients, supporting university shortlisting, course selection, and platform onboarding, with a 95% satisfaction rating
- Analyze customer feedback to suggest data-driven enhancements.Used data and product analytics tools to track user behavior, performance, and identify areas for improvement
- Collaborated with cross-functional teams across Sales, Marketing, Engineering, and Analytics to translate client and internal requirements into actionable solutions, ensuring a consistent and aligned product experience

Projects

Interactive Multiplayer Board Game

GitHub Repo

- Architected a real-time multiplayer Ludo game with Node.js, Express.js, and Socket.IO, featuring responsive gameplay, intelligent move validation, turn management, and win logic for up to 4 players
- Developed a full-stack lobby system with real-time player status, matchmaking, and in-game chat for a seamless multiplayer experience

Other Personal Projects

EdTech: Project LearnWise | E-commerce:Basket Heaven| Fitness App: Befit

Education

Masai School, Full Stack Web Development (FSDS)

Dec 2023 – Aug 2024

Sathyabama University, Bachelor of Engineering (B.E)

Aug 2014 – Jul 2018
